CAREER SUMMARY

Data Analytics intern and final-year BCA student with hands-on experience turning raw, unstructured datasets into decision-ready Power BI dashboards and SQL-driven insights. Delivered a churn analysis flagging 58% customer attrition and ~57% revenue at risk, and built dashboards adopted by an industrial project team at Tata Steel. Seeking a Data Analyst internship to apply SQL, Power BI, and Python skills to real business problems.

EXPERIENCE

Data Analytics Intern — Tata Steel

July 2026 (4 Weeks)

- Cleaned and profiled a masked industrial dispatch dataset — resolved missing values, duplicate columns, and inconsistent entries across 6+ operational fields to make it analysis-ready.
- Designed and built an interactive Power BI dashboard converting raw dispatch, freight, transit-time, and material-distribution data into a self-explanatory view usable by first-time stakeholders.
- Extended the dashboard into a White Rust Root Cause Analysis (RCA) support tool, tracking KPIs across plants, transporters, and destinations to support the investigation team.
- Presented findings directly to the project guide; incorporated 2 rounds of feedback to align the dashboard with real reporting needs.

Currently Upskilling: Data Science & AI/ML Program, Vizztal Academy — building foundations in Python programming (Ongoing).

PROJECTS

Customer Churn Analysis | SQL, MySQL Workbench

Feb – Mar 2026

- Queried 1,000+ customer records using joins, CTEs, and window functions to identify key churn drivers.
 - Surfaced a 58% churn rate and ~57% of revenue at risk, providing a prioritized list of at-risk segments for retention action.
- github.com/KhushiKumari-27/Subscriber-Churn-Analysis

Student Productivity Analysis Dashboard | Power BI, DAX, Power Query

Mar – Apr 2026

- Built an interactive dashboard analyzing daily student activity patterns to identify drivers of low productivity.
- Found 65%+ of days logged as low-productivity, pinpointing screen time above 6 hours as the leading factor — directly actionable for behavior recommendations.

EDUCATION

Bachelor of Computer Application — Srinath University, Jamshedpur

2024 – 2027 (Pursuing)

- CGPA 9+ (last 2 semesters); 85%+ aggregate across the last 4 semesters.

Senior Secondary (Science) — Jamshedpur Women's College

2022 – 2024 | 79.8%

TECHNICAL SKILLS

Languages & Databases: Python, Java, SQL, MySQL, PostgreSQL

BI & Reporting: Power BI (DAX, Power Query), Excel (Pivot Tables, Functions), Tableau, Google Data Studio

Data Analysis: Data Cleaning, Extraction, ETL, Interpretation, Manipulation

Other: Generative AI Tools (ChatGPT), MS Office

CERTIFICATIONS

- Excel for Data Analysis — CodeAcademy
- SQL for Data Analysis — Udacity
- Power BI for Beginners — Simplilearn
- AI Tools & ChatGPT Expert — BE10X

LEADERSHIP & EXTRACURRICULAR

Event Coordinator — College Fest

- Managed computer system setup, file submissions, and attendance tracking for 100+ participants across a college-wide fest.
